

INFINITE HEATER CONTROL FROM ONE REMOTE

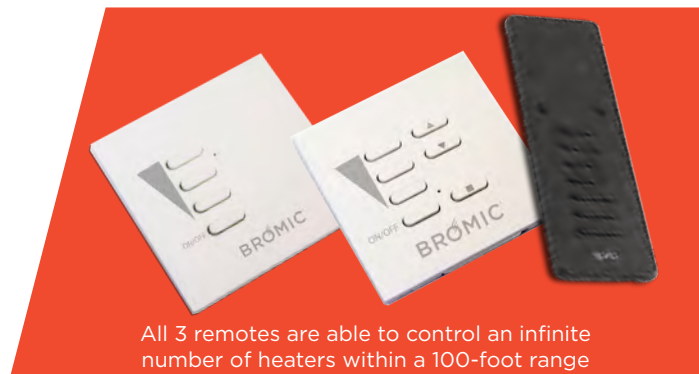

BROMIC HEATING'S ALL-NEW WIRELESS CONTROL SOLUTIONS

Bromic Heating's all-new Wireless Controllers are the first of their kind, seamlessly integrating purpose-designed wireless receivers into wired power supplies in a way that simplifies installation and allows effortless adjustment of electric heater output via a range of wireless remote transmitters. As a genuine, manufacturer-supported accessory, these controllers allow users to customize comfort with confidence in the fact that each unit has passed Bromic Heating's rigorous product testing and will work exactly as intended.

Each unit is capable of controlling up to 6kW* of heating energy in a number of configurations, including:

- Individual element control in twin-element Tungsten Smart-Heat™ Electric heaters (4kW and 6kW)
- Independent control of two single-element Tungsten Smart-Heat™ Electric heaters (3kW maximum per heater)

*@ 230VAC

All 3 remotes are able to control an infinite number of heaters within a 100-foot range

2x Tungsten Smart-Heat™ Electric 2kW

2x Tungsten Smart-Heat™ Electric 3kW

1x Tungsten Smart-Heat™ Electric 4kW

1x Tungsten Smart-Heat™ Electric 6kW

INFINITE HEATER CONTROL FROM ONE REMOTE

BROMIC HEATING WIRELESS CONTROLLER

The Bromic Heating Wireless Controller has the ability to switch power supply to two separate circuits, enabling independent 'On/Off' control of two single-element heaters (2kW or 3kW) or a single twin-element heater (4kW or 6kW) per unit. The unit's 4-channel remote control transmitter is entirely portable but can be easily mounted with a double sided adhesive or with screw provisions within the case.

4-CHANNEL REMOTE

WIRELESS CONTROLLER

BROMIC HEATING WIRELESS DIMMER CONTROLLER

The Bromic Heating Wireless Dimmer Controller enhances the functionality of our base-model Wireless Controller with the ability to dim heating output over a percentage gradient. The included 7-channel remote control transmitter differs from its 4-channel counterpart in its ability to quickly reduce heating output to 25%, 50% or 75%, while also offering the ability to adjust output up/down in increments of 1%.

7-CHANNEL REMOTE

WIRELESS DIMMER CONTROLLER

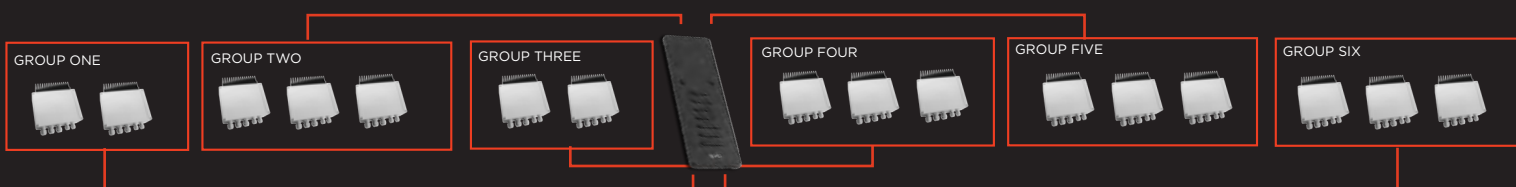

BROMIC HEATING WIRELESS MASTER REMOTE

The Bromic Heating Wireless Master Remote offers unparalleled customization to those wishing to push our Wireless Dimmer Controllers to the absolute limit. While our incredibly capable 4-channel and 7-channel transmitters are able to adjust an infinite number of control units in unison within a 100ft range, the Master Remote can split these units into 6 groups and adjust their output independently. Featuring 42 transmission channels, this remote can be user-programmed to suit individual needs and is an absolute must for larger venues.
